

ANUSHKA DUBEY

Pune, Maharashtra | anushkaaddubey@gmail.com | +91 7999172774 | [Linkedin](#) | [Portfolio](#)

Professional Summary

Frontend Developer (React.js/Next.js) with 2+ years of experience building performant, scalable, and accessible web apps. Strong in SSR, state management (Redux Toolkit), and modern UI engineering practices (code splitting, lazy loading, secure coding). Comfortable integrating REST APIs and optimizing page speed, Core Web Vitals, and UX. Data-savvy: able to turn product and usage data into dashboards and insights using Excel, SQL, and Python. Collaborative in Agile teams with CI/CD pipelines on Azure.

Work Experience

Software Developer | Bhalekar.ai, Pune (May 2025 - Present)

- Improved page load and interaction performance by 40% using Next.js SSR, dynamic imports, and bundle optimization.
- Built reusable, documented UI component library, cutting duplicate code by 35% and accelerating feature delivery.
- Drove Agile ceremonies and sprint hygiene in Jira; partnered with designers and backend to ship accessible, responsive features.

Software Engineer | Expleo Group, Pune (Aug 2023 - May 2025)

- Delivered responsive React interfaces integrated with Redux Toolkit and REST services.
- Boosted system responsiveness by optimizing data flows and caching for Backend integrations.
- Streamlined Jira workflows to achieve 34% faster issue resolution and clearer release tracking.

Projects

- Portfolio Website React.js, responsive, image optimization, route-based code splitting.
- E-commerce Frontend — Next.js with SSR for faster initial paint, SEO improvements, and stable hydration.
- Expleo Insurance App — Scalable React UI with Redux; real-time data handling; accessible forms and validation.

Technical Skills

Frontend & UI: React.js, Next.js (SSR, dynamic imports), TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive UI

State & Data Layer: Redux Toolkit, React hooks/context, REST APIs, JSON

Performance & UX: Code splitting, Lazy loading, React.memo

Backend & DB (integration): SQL, Python, MongoDB

Tooling: Git, GitHub, Webpack, npm

Cloud & Automation: Microsoft Azure, Power Automate

Security & Quality: Secure coding principles, XSS prevention, CORS handling, input validation

Collaboration: Jira, Agile/Scrum, Teams, Outlook, PR reviews, Excel Sheets
